PERSONAL STATEMENT

Dedicated Senior software engineer with **5+ years of experience** as a full stack developer. I to seek a position to utilize my skills, and abilities and apply my knowledge in software development in a reputed organization and want to secure my future.

EDUCATION

Diploma in computer engineering

Swaminarayan College of engineering
2009–2014, Gandhinagar, India

Bachelor of engineering in computer engineering

Sal institute of technology
2014– 2017, Ahmedabad, India

KEY SKILLS

Fluent in English, Time management

Ruby , Rails, Git, Gitlab, Jira Heroku, Aws, Docker
PostgreSQL, Mysql HTML/CSS/JS, react js, Bootstrap
Javascript, JQuery, Ajax, Typescript, Next Js
ElasticSearch, CI/CD, Rspec, Agile, deployment,
rubymine, API Integration, Redis, Memcached,
Heroku, DigitalOcean, MVC

WORK EXPERIENCE

Senior Software Engineer

Proxify - Remote

Jan 2023– Present, London, England, UK

Senior Software Engineer

Bulletproof (Cyber Security) - Remote

Jan 2022– Present, Stevenage, England, UK

Senior Software Engineer (Promote to Team Lead)

Crest Data System - On Site

May 2021–Jan 2022, Ahmedabad, India

Senior Software Engineer

Mainstreet USA (Now rename to Hoist)- remote

Aug 2020–April 2021, Los Angeles, CA, US

Software Engineer

Upwork - Freelance

June 2017–July 2020

Ruby On Rails Intern

Complitech Solutions Private Limited - Fulltime

Jun 2016 - May 2017

ROLES & RESPONSIBILITIES

- Self-taught, proactive, responsible, results-oriented.
- Technical skills: Ruby on Rails, API Design, HTML5/CSS3/JQuery, Bootstrap, Web-Based Application, GraphQL API, Databases (Postgres, SQLite, MySQL), Code versioning (GitHub, Bitbucket), Deployment (Heroku, AWS, S3), Open source, Background Jobs (Sidekiq, delayed job, Redis), API Integrations (Stripe, Paypal), Development Tools (Trello, Slack, Jira, Bitbucket).
- Specialization: Cloud-based Accounting, ERP projects, E-Commerce, Financial projects, API integrations, Blogs/Websites, Developing websites from scratch.
- My primary responsibility lies in driving the end-to-end development process of web applications. This entails not only the creation of user-friendly interfaces using HTML5, CSS3, jQuery, and Bootstrap but also the implementation of responsive designs that ensure a seamless experience across devices and screen sizes. Through my comprehensive understanding of front-end and back-end development, I create applications that are visually appealing and functionally robust.
- A crucial aspect of my role involves API design and integration. I excel in architecting GraphQL and RESTful APIs that facilitate efficient data communication between different components of applications. This enables effective integration with external services and internal systems, enhancing the overall functionality and user experience.
- Database management is another key area where I excel. My proficiency in databases such as PostgreSQL, SQLite, and MySQL allows me to design and maintain structured data repositories. By optimizing database queries and ensuring data integrity, I contribute to the performance, reliability, and scalability of applications.
- Collaboration and teamwork are integral to my approach. Working closely with cross-functional teams, I actively engage in requirements gathering, translating business needs into technical specifications. Participating in code reviews, brainstorming sessions, and knowledge sharing, I foster an environment of continuous learning and improvement.
- One of my notable strengths lies in integrating third-party APIs, particularly payment gateways such as Stripe and PayPal. By implementing secure and seamless transaction processes, I enhance the e-commerce capabilities of applications, offering users a streamlined and secure purchasing experience.
- Version control and deployment are critical aspects of my role. Proficient in platforms like GitHub and Bitbucket, I manage codebase changes effectively, ensuring collaborative development and version tracking. Furthermore, I deploy applications to cloud platforms like Heroku and AWS, guaranteeing reliable hosting, scalability, and efficient resource management.
- In essence, my roles and responsibilities as a web developer encapsulate a diverse skill set applied to various stages of application development. My proactive attitude, technical prowess, and commitment to collaboration ensure that I deliver results that align with project goals and exceed expectations.
- Please check the website on which major project I have worked: [Projects](#)
